## SAFT Plant Tour

On October 11, 2013, VSU's IMA student chapter was given the opportunity to visit SAFT, a company that manufactures and designs advanced technology batteries for the industry. SAFT is the world leader in the design and manufacture of nickel-based and primary lithium batteries for industrial use. 8 students were able to tour 2 of SAFT's production rooms. They were able to see firsthand part of the process of the production of SAFT's batteries.

## CORE Ropes Course

Nine of VSU's IMA members participated in the CORE ropes course on October 19th 2013. The students participated in low and high element activities that encouraged teamwork among the participants. The course consisted of different obstacles where trusting your group members and strong leadership skills are key. VSU's ropes course provided excellent bonding activities for our organization and lots of fun too!

## 1st IMA Meeting

VSU's IMA student chapter held its first meeting for the 2013-2014 school year on August 27. New members were introduced to the IMA organization and given some background information of IMA. Our guest speaker of the evening was Chris Winstead, executive team leader at Target.
