

Without Limits Platform

“Advancing a campus Without Limits for all students.”

The Without Limits ticket trusts that on a campus filled with a vast array of races, religions, sexualities, and cultures, we can succeed together Without Limits. Our goal for the Student Body and the Student Government Association is to be an entity that is not separated by any barriers. We are built off of the four-fold beliefs of Passion, Purpose, Proficient, and Prosperous.

We are committed to leading a Student Government Association that believes in the student body's **passions**.

- We believe in the value of representing the concerns that matter most to students who attend Valdosta State University. Therefore, we must equip our senate with members who are dedicated to various spheres of the student body.
- We believe the best way to be an effective representation of these concerns is to actively collaborate with other organizations in hopes of reaching the largest number of students. By building these relationships we are helping to foster the development of the university and creating a deeper level of unity within the student body.
- We believe that, in order to be an accurate representation of the entire student body, we must regularly consult those with different interests, backgrounds, and professional knowledge. By doing this, we would share a common goal of discovering a solution that would better represent all of Valdosta State University's students. We must always seek new opinions, especially specific feedback from those who are directly connected to whatever concern we are handling.
- We believe that it is our responsibility to place the concerns of others above that of our own, so that we may lead with unbiased intentions for the betterment of the student body. We must stand strong in our unanimous decisions, but only after they have been undeniably proven to be the position of the entire student body.

We are determined to lead with a **purpose** in which the most progress can be made on behalf of the student body.

- We believe in working aggressively as an organization in order to provide prompt solutions to the unique concerns that challenge our diverse, ever-growing, and innovative

institution. In order to do this, we must maintain an orderly and well-structured Student Government Association.

- We believe that we must provide a unified goal for each challenge we take on in order to precisely solve the difficulties at hand, with confidence that the concern will not arise again. In the event that it may, we must be prepared to combat it strategically while continuously updating the student body on the progression of such issues.
- We believe that we must establish a competent team within the university in hopes of strengthening our abilities to accomplish the tasks set in front of us. Our partnership with faculty across the university is important to the amount of progress we are able to accomplish.
- We believe in the hard work ethic of those who surround us. We must make sure that those who are deserving of recognition do not fall short of it. We acknowledge that our success only stems from the dedication of those who support us.

We are dedicated to providing **proficient** work to the university as well as those who attend it.

- We believe that advanced research must go into each challenge we face in order to be sure the outcome is the absolute best option for not only the current student body but for all students in the years to come.
- We believe that handling student's concerns in a timely manner constitute great importance and the progress of these concerns shall be provided in annual updates from a member of our executive team.
- We believe that the knowledge we hold toward any given subject should be better communicated with the student body to raise awareness regarding the concern, as it affects each of us.
- We believe that student's frustration with any concern is of high value and should be immediately taken into consideration in order to affirm that student's opinions are recognized by the university.

We are unwavering in our commitment to change and develop this university so that it may be **prosperous** for not only ourselves but for the future blazers to come.

- We believe that student involvement is the only way to succeed in effectively leading the student body. We actively seek solutions that will allow for the most success regarding all students, without restriction to anyone.

- We believe that the education we are all earning should be as fair and equal as physically possible. We constantly advocate for those who are struggling in any way to feel that of the contrary.
- We believe that the only way to succeed is to succeed together as a whole. If we are failing one person, group, or body then, we are all failing.
- We believe in the power of what we are doing. We are firm believers that anyone can make a difference and that the differences we make here are unprecedented.
