

Save the river

No more pollution

No more industrial waste

We don't need any more industries on the river! They will just pollute the river even more then it is!

The Flint River before pollution.

The flint river is already polluted! The people who want to add a business will just dump more waste in the water. They may say they won't but, I know they will dump there waste in the river. Animals die by polluted rivers let's not let any more die.

Animals will eat the trash.  
Do you really want that animals to die for a business?

This is the Flint river already. If we let them have another business it will look

like the one on the left.
