Second Life: What do I do now?

You have already set up your account at www.SecondLife.com and you need to know what to do next.

All of the information below is found in the videos and written documents.

These guides are located in the “Second Life: Videos and Guides” module of CONTENT

Part of the very first assignment in this class is to introduce yourself to your classmates and have them get to know you too. The way to do this is by creating a 5-6 slide presentation in PowerPoint and posting it in Second Life (or having me do it for you).

- Watch the video called “How To Find Presentation Park” In this video I have already created a brand new avatar, and the video starts with me on a beach with a bunch of strangers. I show you how to get to Valdosta State University and Presentation Park.

- Create a 5-6 slide presentation using the guide called “What to Include in the PowerPoint Presentation”
  - The most important thing to remember is your two names (real life name and Second Life name) as well as the course number (4010, 6010, 4050, 6050, etc) on the first slide

- After you have created your presentation, read the document called “Uploading your Presentation”
  - This will explain the options of either having me do it for you or doing it yourself.

- Read your classmates’ presentations
  - To view others’ (and your) presentation, there are large green arrows on the sides of the slideshow viewers to advance the slides.
  - Clicking on “START” merely brings the presentation to the first slide. The slides do not move automatically.
